Professional Summary

Early-career UI/UX and Product Designer focused on AI-powered and B2B SaaS products. Experienced in designing dashboards, workflows, and decision-support systems where AI assists users instead of replacing them. Strong foundation in UX fundamentals, human-in-the-loop design, and complex system thinking with an engineering background.

Core Skills

Design: UI/UX Design, Product Design, Interaction Design, Visual Design

UX: User Flows, Information Architecture, Wireframing, Prototyping, Usability Thinking

AI & Systems UX: Human-in-the-Loop UX, Explainable AI UX, Trust & Safety UX, Governance UX

Domains: B2B SaaS, Enterprise Dashboards, AI Decision Systems

Tools: Figma, FigJam, Miro, Notion, Framer

Projects & Case Studies

Priora — AI Decision & Productivity Platform

- Designed task prioritization and decision workflows for individual professionals
- Added confidence indicators to improve clarity and trust in AI suggestions
- Focused on UX where AI supports user judgment instead of replacing it
- Delivered a complete end-to-end UX case study

Aegis AI — Enterprise AI Governance Platform

- Designed interfaces for AI output review, approval queues, and audit logs
- Created role-based workflows for reviewers, managers, and compliance teams
- Focused on transparency, accountability, and regulatory-ready UX

AI Governance Builder — Automation & Safety Platform

- Designed rule builders and safety thresholds to control AI behavior
- Integrated human review points for high-risk automation workflows
- Focused on scalable and safe enterprise automation UX
